Most adults, 40 years or older, have some level of heart disease and over 18 million adults over the age of 20 have some form of CAD (coronary artery disease). The Multifunction Cardiogram is a device that gathers diagnostic data on a patient's cardiac system. This technology can indirectly measure the health of your cardiac system non-invasively, with no needles, radiation or chemical drugs. It does this by directly measuring the burden your entire cardiovascular system is carrying in less than ten minutes. This diagnostic tool makes it practical for physicians' practices, and patients like yourself, to accurately understand the level of risk and level of cardiac burden you are facing and do so in a quick, easy and meaningful way.

IMPORTANT NOTES: Most Cardiovascular Disease is due to CAD. The vast majority of CAD is both preventable and reversible. Many patients with CAD can derive significant cardiovascular and health benefit from positive lifestyle changes.

What to Expect: The MCG Diagnostic Analysis is comprised of electrical measurement leads that are placed on both wrists, both ankles and an electrode on V5 left side of heart. The test will run for 82 seconds approximately 5 times, or just under 7 minutes. It is important for the subject to relax, breathe normal, but not fall asleep.

INFORMATION ABOUT THE RISKS AND BENEFITS: There are no significant risks from participation. The MCG Diagnostic Analysis which is completely external to the subject and simply requires that electrical leads be placed as mentioned above.

COST: There is a cost for each scan.

INFORMATION ABOUT CONFIDENTIALITY: We take privacy and confidentiality very seriously and follow all protocols for HIPAA and the Privacy Act. Your privacy will be protected by standard patient's Privacy ACT and HIPAA. The data gathered will be placed in a secured electronic medical records system.

CERTIFICATE OF CONSENT: I have read the foregoing information, or it has been read to me. I have had the opportunity to ask questions about it and any questions that I have asked have been answered to my satisfaction. I consent to have the MCG scan done.
